FACULTY OF DENTISTRY

Ain Shams University

PRESENTS

A GLIMPSE TO OUR BACHELOR DEGREE PROGRAM IN DENTISTRY “CLINICAL DENTAL PROGRAM” CREDIT HOUR SYSTEM

Faculty of Dentistry, Ain Shams University is located in the center of Cairo with up-to-date facilities for patient care, student clinical practice and training, and education and research in dental and oral diseases and disorders.

Our Program is a 5-year program based on credit hour system, which prepares you to receive a Bachelor Degree in Dental Medicine and Surgery.

Through our program, you will receive personalized guidance from a faculty advisor as they guide you in a rigorous academic setting and help you meet your goals.

Our committee will assist you by providing guidance in selecting the appropriate curriculum for each year.

DEAN'S MESSAGE

The Dean of our Faculty would like to welcome you all to the Faculty of Dentistry, Ain Shams University. The dean and administration are your partners in your quest to reach your academic and personal goals.

Orientation is the first step on this remarkable journey. Our challenge provides a set of expectations for students to set a clear path for their success and encouraging them to excel, engage, choose and serve.

I am confident in your ability to meet challenge and we will do all what we can to support you in doing this.

Pro. Dr. Mohamed Diah

Dean of the Faculty of Dentistry
Ain Shams University

FACULTY VISION

The vision of the Faculty of Dentistry, Ain Shams University is to be a nationally and regionally recognized dental school known for innovative educational programs, superior skills of qualified graduates, and efficient degree of community service.

FACULTY MISSION

The mission of the Faculty of Dentistry, Ain Shams University is to serve a highest level of efficient dental education that qualifies the graduates for being a competent dentist through:

- Educating undergraduate students, the future dentists or specialists in an interactive way to provide excellence and current knowledge of dental health care.
- Providing a leadership role in scientific research field to achieve the concept of applied scientific research and to develop and modify treatment modalities in the field of dentistry.
- Providing safe and efficient dental healthcare service to the public and expanding the awareness about dental care all over the community.

ADMISSION

Our admission starts every year in May, where the application is available online on our official website: Dentistry.asu.edu.eg.

Our program accepts students that have fulfilled the General Secondary Certificate or equivalent, providing that their grades are eligible for admission in any governmental School of Dentistry all over Egypt.

Our acceptance is based upon first come first served basis.

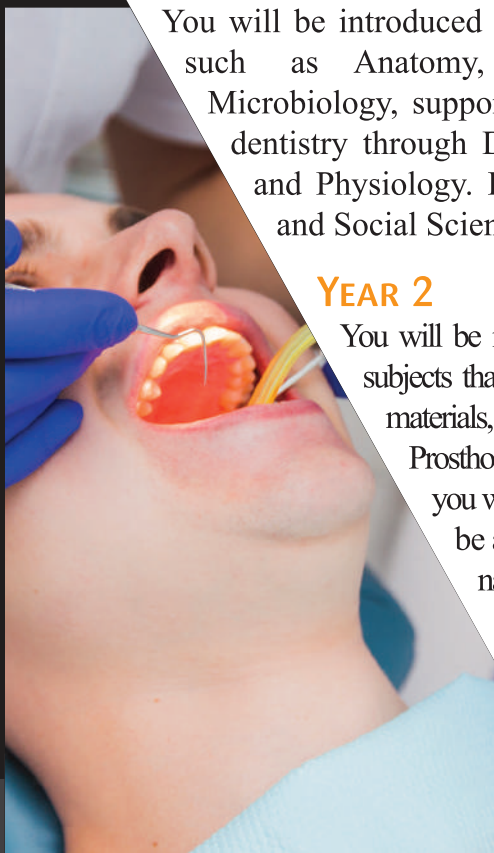

A TOUR THROUGH OUR PROGRAM

YEAR 1

You will be introduced to all aspects of biomedical sciences such as Anatomy, Physiology, Biochemistry and Microbiology, supported by the teaching of a glimpse of dentistry through Dental Terminology, Dental Anatomy and Physiology. In addition to, some Computer skills and Social Sciences.

YEAR 2

You will be introduced to the theory and practice of the subjects that form the clinical basis of dentistry: Dental materials, Oral histology, Operative dentistry, and Prosthodontics. As part of the introduction to dentistry you will learn about infection control that you will be applying in every step of the way and the nature of dental caries. In addition to, the completion of some important biomedical sciences such as Pharmacology and Pathology joined with a brief on General surgery and Medicine.

YEAR 3

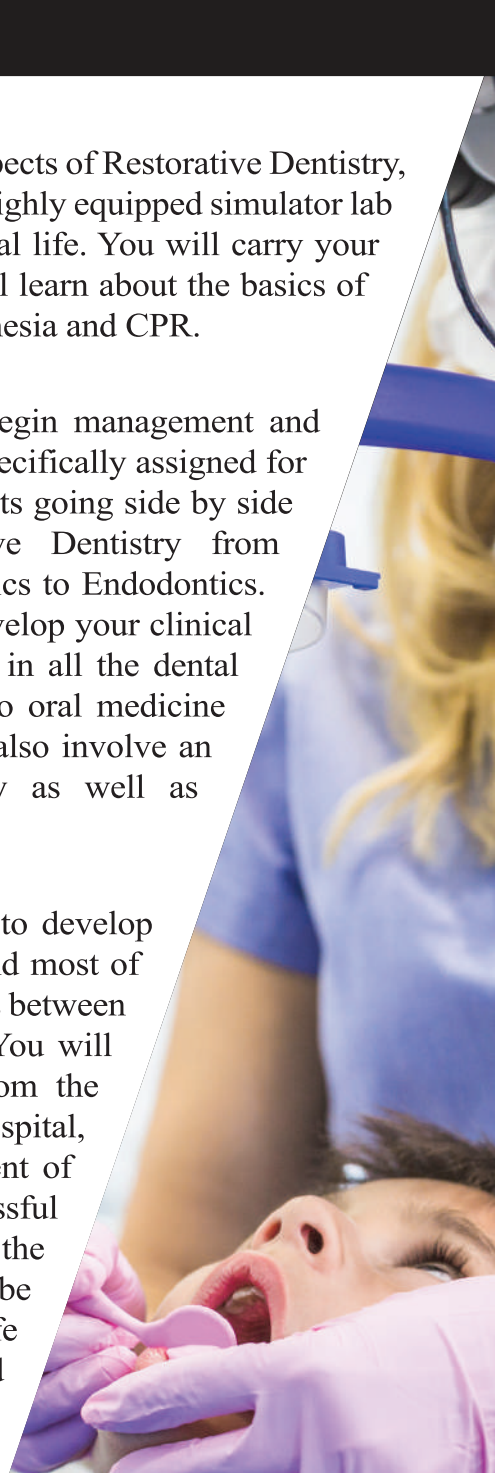

You will expand your skills in all aspects of Restorative Dentistry, Radiology and Prosthodontics in a highly equipped simulator lab designed for achieving a real clinical life. You will carry your first diagnosis in the clinic. You will learn about the basics of Dental Public Health, Dental Anesthesia and CPR.

YEAR 4

Coming to real action, you will begin management and treatment of patients in the clinic specifically assigned for the Clinical Dental Program Students going side by side with all branches of Restorative Dentistry from Operative Dentistry to Prosthodontics to Endodontics. You will have an opportunity to develop your clinical skills through exposure to patients in all the dental disciplines. You will go deeper into oral medicine and periodontology. Teaching will also involve an introduction to pediatric dentistry as well as occlusion.

YEAR 5

You will have a great opportunity to develop your clinical skills as you will spend most of your time in the dental school clinics between the various branches of dentistry. You will be able to comprehend a case from the moment the patient arrives at the hospital, through the history and development of treatment plan, to reaching a successful integrated treatment. Approaching the end of this program, you will be qualified to conquer the clinical life with a high level of knowledge and professionalism.

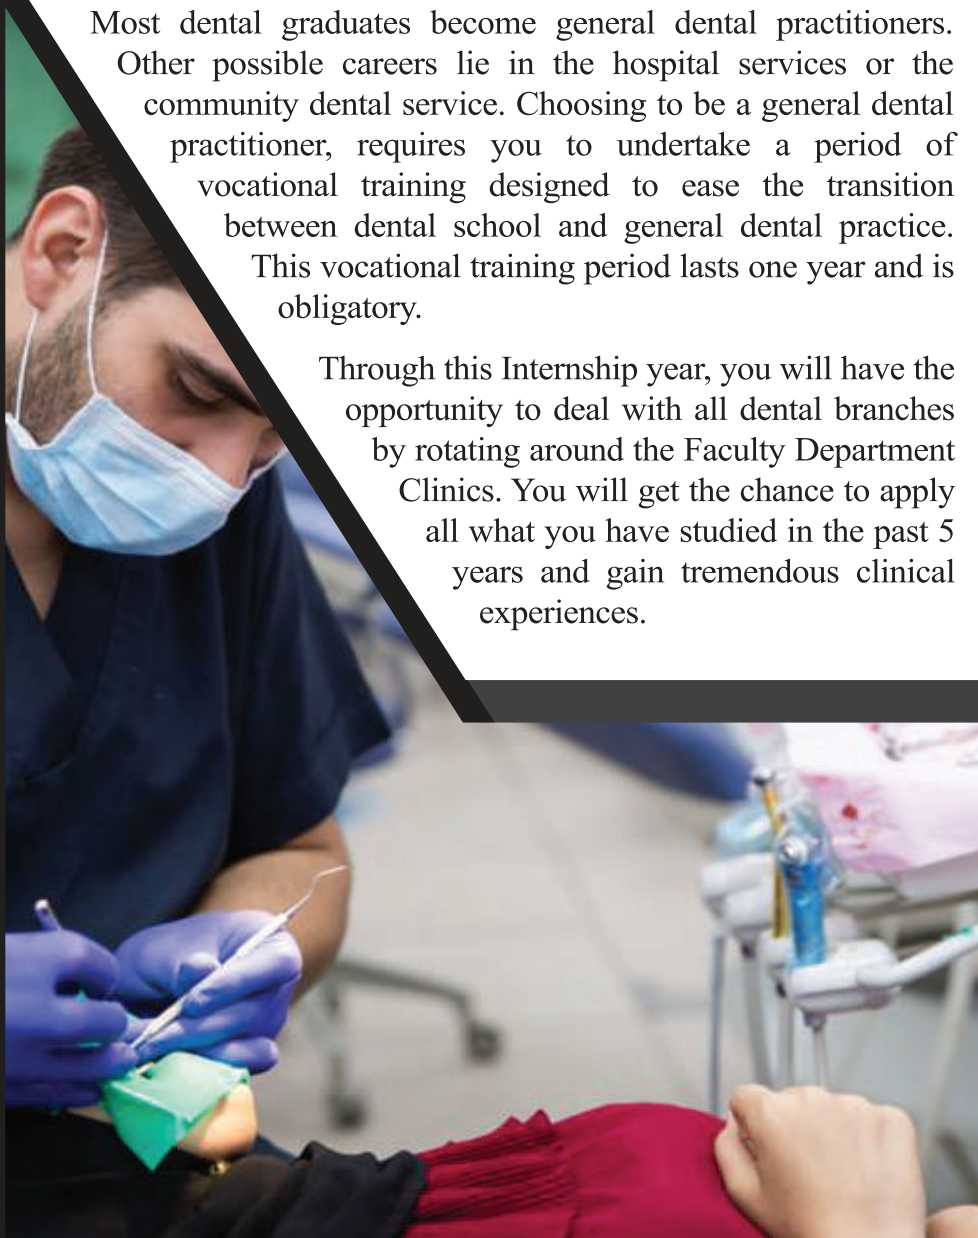

CAREER PROSPECTS AND INTERNSHIPS

Most dental graduates become general dental practitioners. Other possible careers lie in the hospital services or the community dental service. Choosing to be a general dental practitioner, requires you to undertake a period of vocational training designed to ease the transition between dental school and general dental practice.

This vocational training period lasts one year and is obligatory.

Through this Internship year, you will have the opportunity to deal with all dental branches by rotating around the Faculty Department Clinics. You will get the chance to apply all what you have studied in the past 5 years and gain tremendous clinical experiences.
