87 Al Maqrizi, Mansheya El-Bakry, Heliopolis, Cairo.

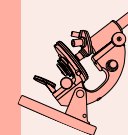

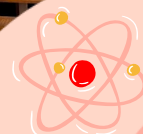

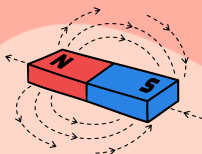

bio_coordinator@edu.asu.edu.eg

Teaching system

- Program includes 118–122 credit hours.
- It is completed over 8 semesters (4 academic years).
- After finishing the program, students can apply for a teaching license.

Admission Requirements

- Obtained a General Secondary Education Certificate (Science Track - Biology) or equivalent.
- Achieved qualifying score for program admission.
- Subject to college's internal placement and coordination system.

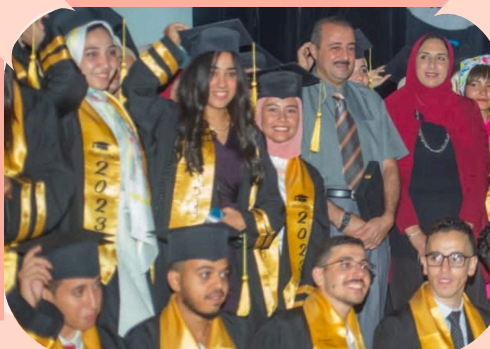

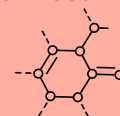

In the final year, students do field trips and training for two semesters.

Mission

- Prepare science teachers for modern educational and job market needs.
- Teach skills in teaching, technology, Arabic, and English, while considering the individual differences.
- Promote ethics and national identity
- Help graduates find or create jobs in science fields.
- Promote interdisciplinary learning to connect science with other fields.
- Qualify graduates for academic and professional postgraduate studies.
- Raise awareness of science's role in society and civilization development.
