Education:

- **1973: Ph.D. in Experimental Nuclear Physics, Technical University, Dresden Research Center, Rossendorf, Germany.**
- **1967: M.Sc. in Gamma Spectroscopy, Faculty of Science, Ain Shams University, Cairo, Egypt.**
- **1964: B.Sc. in Special Physics, Faculty of Science, Ain Shams University, Cairo, Egypt.**
- **1960: Baccalaureat Francais in Science, Lycee Franco – Egyptien, Heliopolis, Cairo, Egypt.**

Editorial ship:

Reviewer for the following international journals:

- **Scientific & Academic Publishing Co, 2016:**
 - American Journal of Materials
 - American Journal of Polymer Science.
 - Journal of Nuclear and Particle Physics.
 - Journal of Nanoscience and Nanotechnology
- **Journal of Polymer Research 2016**
- **Journal of Advanced Research 2017**
- **Reviewer for Polymers for Advanced Technologies 2018**

Employment History:

- **1989 – 2003: Full professor & Chair of the Consultant Unit for Materials Properties & Environmental Radiation Studies (CUMPERS), Nuclear-solid state physics, Faculty of Science, Ain Shams University, Cairo, Egypt.**
- **Since 2003: Professor, Emeritus and Chair of the Consultant Unit for materials properties & environmental radiation studies (CUMPERS), Nuclear-solid state physics, Faculty of Science, Ain Shams University, Cairo, Egypt.**

- **1980 – 1984: Associate Professor & head of the physics dept. for girls since 1983 in King Abd El-Aziz University, Saudi Arabia.**
- **2001: Visiting Professor Krause Rehberg at Karl Marx Univ., Halle, Germany in the frame of a Joint Supervision of a Ph.D. Student (channel system between Egypt and Germany).**
- **1995: Visiting Professor Van Veen (past away) at Delft Univ. of Technology, Delft Netherlands in the frame of a Joint Supervision of a Ph.D. Student (channel system between Egypt and Netherlands).**
- **1989: Visiting Professor Frits Pleiter at Rijks Univ., Groningen, Netherlands in the frame of a Joint Supervision of a Ph.D. Student (channel system between Egypt and Netherlands).**
- **1983, 1985, 1987 and 1988 Visiting Researcher at Rijks Univ., Groningen, Netherlands in the field of Hyperfine interaction techniques in materials and for determination of spins of nuclear states.**
- **1982: Visiting Dr. Ottmar Kistner and Dr. Miriam Rafailovich at Brookhaven National Laboratory, USA as Researcher in the field of Perturbed Angular Correlations.**
- **1981: Visiting Researcher at Argonne National Lab., USA in the field of BGO Nuclear detectors.**
- **1973-1976: Post Doctor at Nuclear Research Center, Rossendorf, (ZFK) Germany in the field of Positron Annihilation techniques.**

Institutional and national responsibilities:

- **Since 1997: Founder and Director of the “Consultant Unit for materials properties & environmental radiation studies (CUMPERS)” at the Faculty of Science, Ain Shams University, Cairo, Egypt, for the organization of training courses to scientists in the field of protection from ionizing and non-ionizing radiation as well as in the characterization of nano-structure defects in materials.**
- **Since 2003: Professor, Emeritus at the Physics department, Faculty of Science, Ain Shams University, Cairo, Egypt.**
- **1997-2011: Scientific consultant at “The Science Exploration Center SEC” in Cairo, Egypt for the dissemination of science to the community and school children.**

- **2005-2008:** Consultant at the Egyptian ministry of environment, Cairo, Egypt for ionizing radiation protection.
- **2013-2016:** Vice president of the scientific council at the Egyptian Supreme Council of universities for the award of professorship to university Staff members.

Honors, Awards, or Recognition

- **2018:** Beller Lectureship Award.
- **2015:** Recipient of the “Ain Shams University Excellence Recognition Award in Science” with highest honor gold medal for teaching and research contributions as well as for distinguished services to the community.
- **2015:** Award of the "Shield of Faculty of Science, Ain Shams University", at the celebration of the “Excellence Recognition Award in Science”.
- **Since 2014:** Team leader of "Women in Physics of Egypt” of the IUPAP organization.
- **Since 2013:** APS membership.
- **Since 2011:** Reviewer and Evaluator of the scientific research work for the Egyptian University recipients for the Award of the “Excellence Recognition in Science”.
- **Since 2011:** Reviewer and Evaluator of the projects funded by the “Science and Technology Development Fund (STDF)” organized by the Academy of Science of Egypt.
- **2008-2022:** Recipient of the “Outstanding International Research Publication Award” from Ain Shams University.
- **2007:** Academic Expert at the Joint European Projects (TEMPUS)for reviewing and evaluating “Curriculum Development (CD) projects.
- **1964:** Recipient of the” National honor medal “from the president of the Republic of Egypt for the Award of the first position in rank in B.Sc “Special Physics”.

Supervision of researchers at postgraduate level (43):

Ph. D. thesis supervised (20)

1. Application of a novel non-intrusive methodology for verification of sensitive nuclear materials (2019).
2. Synthesis and Characterization of Hybrid Nanocomposites as Photo catalysts for Wastewater Decontamination (2017).
3. Development of medical heart stent by using nanomaterial graphene composites (2016).
4. Correlation of Positron Annihilation Characteristics with Some Physical Properties of Poly Methyl Methacrylate (PMMA) / Poly Vinyl Alcohol (PVA) Composite (2015).
5. Processing of polymers and its use in some industrial applications (2011).
6. Radiation Identification of (NORM) in air and its relationship with human health and meteorological conditions (2008).
7. Study of flame -retardant polymers and modeling of fire growth and its propagation at the Egyptian Nuclear Installations (2005).
8. Investigations and modeling of dynamics of Environmental Radioactivity levels resulting from non-nuclear industries (2005).
9. Evaluation of radioactivity levels at the ancient Egyptian monuments (2002).
10. Defect studies in semiconducting BaTiO₃ using positron annihilation spectroscopy (2000).
11. Positron annihilation spectroscopy studies in metals and alloys (2000).
12. Nuclear safeguards through measurements of radioactivity of material around nuclear facilities (1999).
13. Application of positron emitted in the decay of ²²Na radioisotope to study free volume in rubber and polycarbonates (1997).
14. Application of positron annihilation techniques to the study of polymer and insulating materials (1997).
15. Positron annihilation studies on Hg-Ba-Ca-Cu-O high temperature super conducting materials (1997).
16. Measurement and analysis of low level natural radioactivity in building Materials and evaluation of its environmental impact (1995).
17. Study of structural defects in chalcopyrite semiconductors by positron annihilation spectroscopy and photoluminescence spectroscopy (1994).
18. Perturbed angular correlation's study of low energy implanted hydrogen and helium atoms interacting with implantation induced vacancies in molybdenum and tungsten (1992).
19. Study of energy levels of some radioactive isotopes (1979).
20. Study of some nuclear properties of the deformed ¹⁸¹Ta nucleus and the electric quadrupole interaction of the hafnium oxide crystal (1979).

M.Sc. thesis supervised (23):

1. Synthesis and Characterization of ZnO/CuS nanocomposite for waste water decontamination using photo catalysis (2019).
2. Comparative characterization study of the Nuclear Track Detector (CR39) and a used Filmstrip for Uranium Ore Exploration.

3. Enhancement of the Hemocompatibility of Coronary Stents by Surface deposition of Different Coatings (2015).
4. Synthesis and Characterization of quantum dots doped glasses for photonic Applications (2014).
5. Synthesis and Characterization of some polymers for heavy metal decontamination of waste water (2013).
6. Study of the microstructure and mechanical properties of cast Al-6063 doped with SiC nanoparticles (2013).
7. Study of Titanium oxide- Graphene composites for solar energy Applications (2012).
8. Correlation of electric and swelling properties with nano free volume structure of conductive Silicone Rubber composites (2010).
9. Preparation and Characterization of some Nanostructured Oxide Materials (2009).
10. Study of the correlation between thermal properties and the variations of Nano- scale free volume in bismuth borate glasses (2008).
11. Correlation of the mechanical properties and Nano-free volumes in glassy Polymers (2007).
12. Positron trapping in nano-free volumes of deformed polymeric materials (2006).
13. Radiation synthesis of some hydrogel copolymers for treatment of waste water (2006).
14. Study of mechanical properties and recovery stages in the recrystallization process for some aluminum alloys (2004).
15. Study of thermo-mechanical properties of some copper alloys (2004).
16. Study of the environmental radioactive pollution using modern Spectroscopic techniques and its relationship with nuclear safeguards (2002).
17. Spectroscopic investigation of a radioactive isotope (1993) .
18. Study of the energy levels of the gadolinium 152 following the electron decay of the Europium 152 radioactive nuclide (1992).
19. Study of positron decay of the Europium 152 radioactive isotope (1991).
20. Study of nuclear parameters in the decay of ^{77}Ge radioactive isotope (1991).
21. Analysis of the gamma ray spectrum of the lead - 207 and measurement of the mean life time of 570 Kev level using time delay technique (1984).
22. Measurement of the mean lifetime of the 81 KeV in cesium 133 and the analysis of the gamma ray spectrum using hyper-pure germanium detector (1984).
23. Use of some nuclear parameters in the Tantalum - 181 nuclide to study the electric field gradient in Hafnium oxide crystal (1979).

Principal investigator of the following Projects(7)

1-Sponsored by IAEA

- **Defect Structure in Materials using Positron Annihilation Spectroscopy (Sponsored in 1989 by IAEA and in 1993 by Ain Shams University).**

2-Sponsored by Ain Shams University

- **Identification of air pollution in greater Cairo and its relationship with human health and meteorological conditions (1995- 1998) in cooperation with the Egyptian Ministry of Environment and the National Center for Nuclear Safety and Radiation Control, Atomic Energy, Authority of Egypt (AEA).**
- **Preparation and characterization of some flame- retardant polymers for cable insulation applications (2001-2003) in collaboration with the National Center for Nuclear Safety and Radiation Control (AEA).**
- **Study of the effect of gamma irradiation of some polymers used in the remediation treatment of waste water (2004-2007) in cooperation with the National Center for Radiation Research Technology (AEA).**
- **Structural study of some nanomaterials for application in solar cells. (2008-2012).**

- Structural study of Nickel doped Zinc Oxide.
- Preparation of dilute magnetic semi-conductors based on ZnO in nanoparticle form.
- Enhancement of the Hemocompatibility of Coronary Stents by Surface Deposition of Different nano coatings materials (2015-2017).

3-Sponsored by STDF

- Novel Hybrid ZnO-based Nanocomposite as Photocatalyst For Wastewater Decontamination

Language Skills (Spoken and written)

Arabic, English, German, French

PUBLICATIONS :

1-Published papers (81), thesis supervised (43)

2-Translation to Arabic of the French book entitled "L'histoire des sciences" by Pascal Acot in the framework of the encyclopedia for young people entitled "Que sais-je?".

3-E-books: Encyclopedia for nuclear and radiation science in Arabic & English languages.

Teaching Activities:

- Nuclear Physics
- Modern Physics
- Nuclear Reactors
- Environmental Impact of Nuclear Energy Sources
- Positron Annihilation Techniques for the investigation of defects in condensed matter

Research interest:

- 1- Synthesis and Characterization of ZnO-based Nanocomposites as Photocatalyst for Wastewater Decontamination
- 2- Synthesis and Characterization of Structure and Defect structure of materials:
 - Structural study of Nickel doped Zinc Oxide for application in solar

Cells.

- Preparation and Characterization of Some Hydrogels for Water Purification.
- Correlation of Electrical and Swelling Properties with Nano Free-Volume Structure of Conductive Silicone Rubber Composites.
- Effect of Conductive Fillers on the Cyclic Stress-Strain and Nano-Scale free volume Properties of Silicone Rubber.
- Synthesis and Spectroscopic studies on Bi_2O_3 - B_2O_3 glasses.
- Preparation and characterization of some flame -retardant polymers for cable insulation applications.
- Study of thermo-mechanical properties of some copper and aluminum alloys.
- Positron annihilation studies on Hg-Ba-Ca-Cu-O high temperature superconducting, semiconducting BaTiO_3 and chalcopyrite materials.

3-Dose Assessment of Radioactivity in environmental samples at ancient monuments and fertilizer industries as well as around nuclear facilities.

4-Measurement and analysis of low- level natural radioactivity in building materials and evaluation of its environmental impact.

5-Nuclear safeguards determination through measurements of radioactivity of building materials around nuclear facilities.

6-Identification of air pollution in greater Cairo and its relationship with human health and meteorological conditions.

7-Application of Perturbed Angular Correlation technique (PAC) for the determination of quadrupole and magnetic moments of nuclear levels with lifetimes in the sub-nanosecond range(100-300ps).

8-Application of (PAC) for the determination of the electric field gradient & magnetic hyperfine fields of some metals.
